

Vocabulary: Magnetism

Vocabulary

- Attract – to pull together.
- Bar magnet – a simple rectangular magnet with a north pole at one end and a south pole at the other.
- Ferromagnetic – strongly attracted to magnets.
 - Ferromagnetic materials become magnetized when exposed to a magnetic field.
 - Ferromagnetic materials retain their magnetism for a while after the magnetic field is removed.
- Magnetize – to turn into a magnet.
- North pole – the part of a magnet that is attracted to the North Magnetic Pole of Earth.
- Repel – to push away.
- South pole – the part of a magnet that is attracted to the South Magnetic Pole of Earth.
